# MANAGED NETWORK SERVICES

TECHNOLOGY THAT DRIVES YOU...
MANAGED BY THE EXPERTS

Focus on your business and leave your network in the hands of IT professionals

Managed Network Service powered by Proton provides you an outsourced IT provider with 24/7/365 support. Tailor your technology to meet DMS needs and handle any size business, allowing seamless scaling and growth. This service turns over network responsibility to the experts at Proton and can cut operational costs by up to 50% by switching from an in-house solution.

Features and Benefits:

- Network Engineers take ownership of your needs and manage all technology issues at a fraction of the cost.

- 24/7 US-based technical support is available around the clock to troubleshoot any network related issues.

- Our IT teams know the industry and can quickly identify and resolve problems to improve performance and reduce downtime.

- Provides constant, proactive network monitoring to help you protect digital assets and minimize the risk of security breaches.

- Utilize the latest Cisco Meraki hardware to enhance your network accessibility, performance, and reliability.

- Optional VOIP phone access from anywhere inside the dealership that is connected to the Internet.
